Sukkur IBA University
Kandhkot Campus

Hostel Management System (HMS)

A Semester Project

Presented By: Sohail Ahmed Malik

Course Instructor: Sir Adil Khan

Course: Mobile Application Development

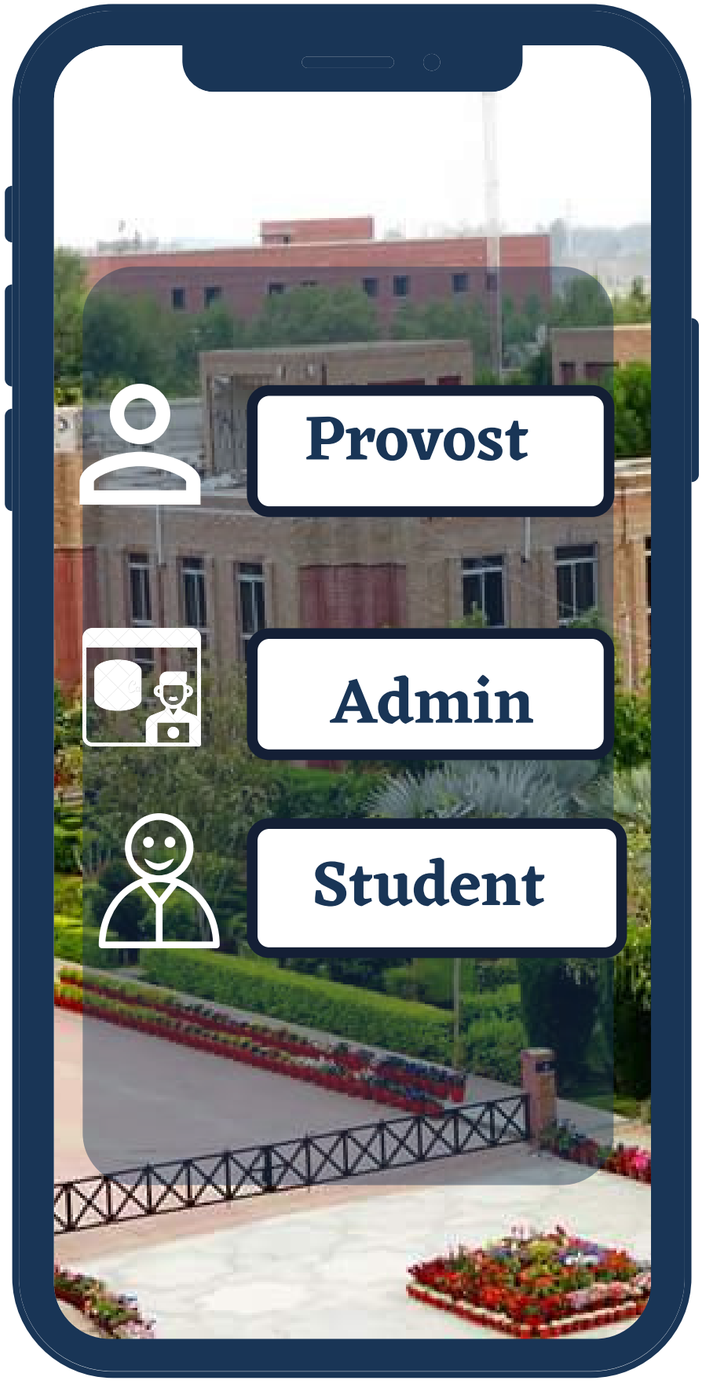
Introduction To The Project

This project is the major requirement of the course completion, and apart from it doing this project aims to develop the programming skills, in the field of Java, Android Development.

Well looking at the current situations of the hostels at Sukkur IBA University Kandhkot Campus, and here its the manual management of the rooms and other facilities, so I want to digitalize it and develop an android application that can make the management of hostel feasible, flexible, portable, efficient, less time consuming and easily manageable.

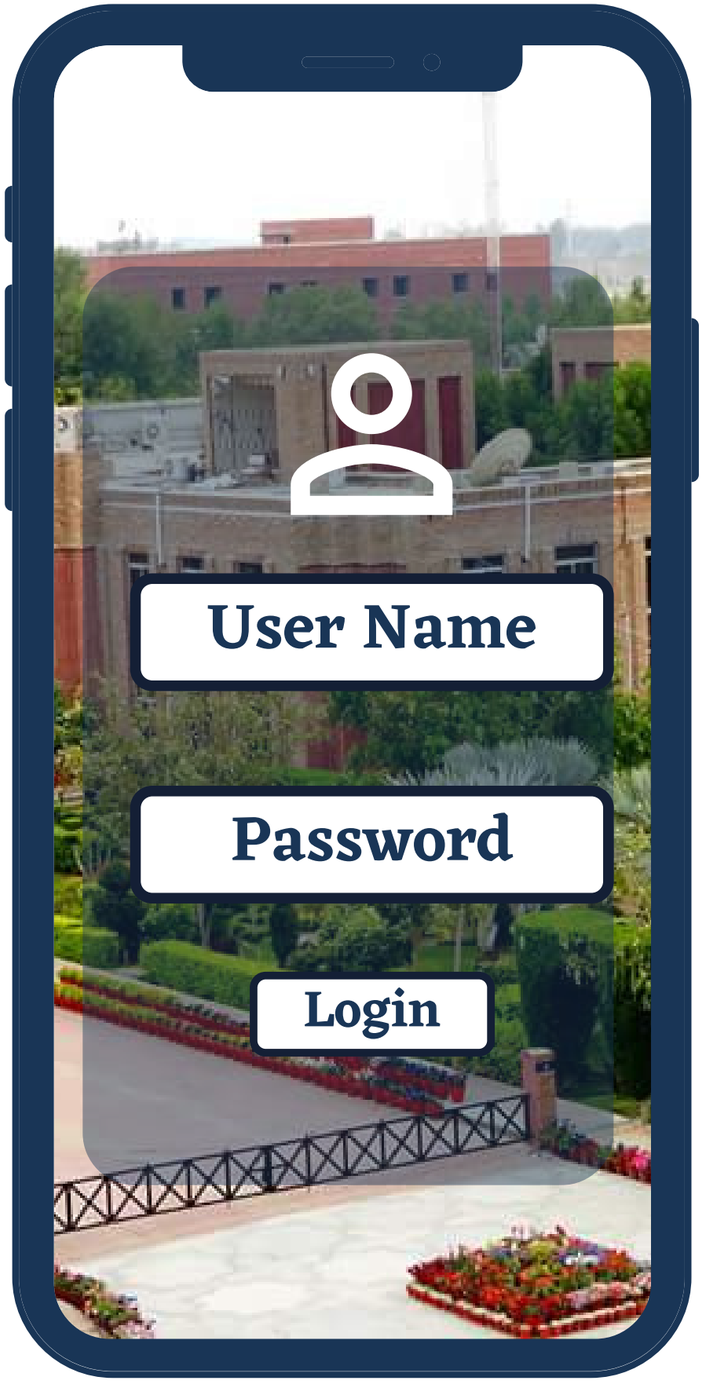
Modules of The Project

- Admin Module
- Provost Module
- Student Module



Admin Module of The Project

Admin Module will have to login first and the he/she has to manage the certain activities,



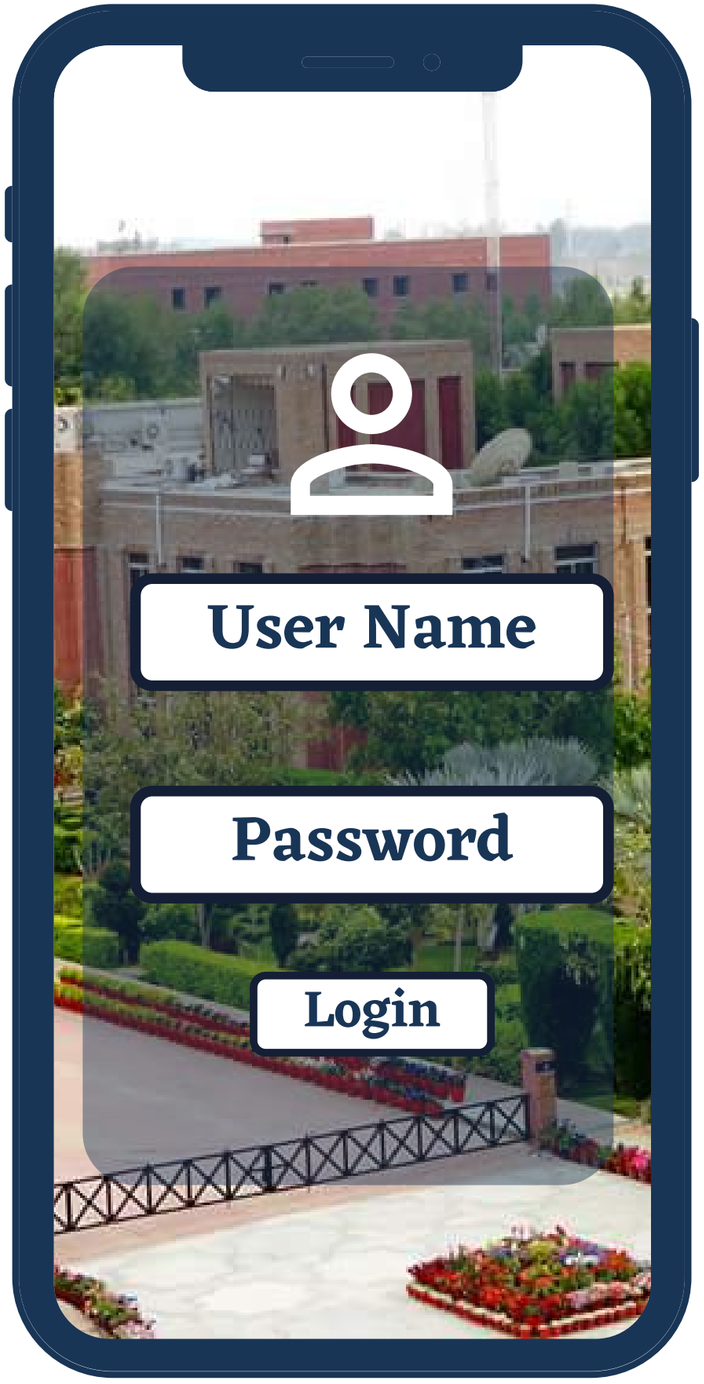
Admin Module of The Project

Admin Level Services Managed

Provost Module of The Project

Provost Level Services Managed

Provost Module will have to login first and the he/she has to manage the certain activities,



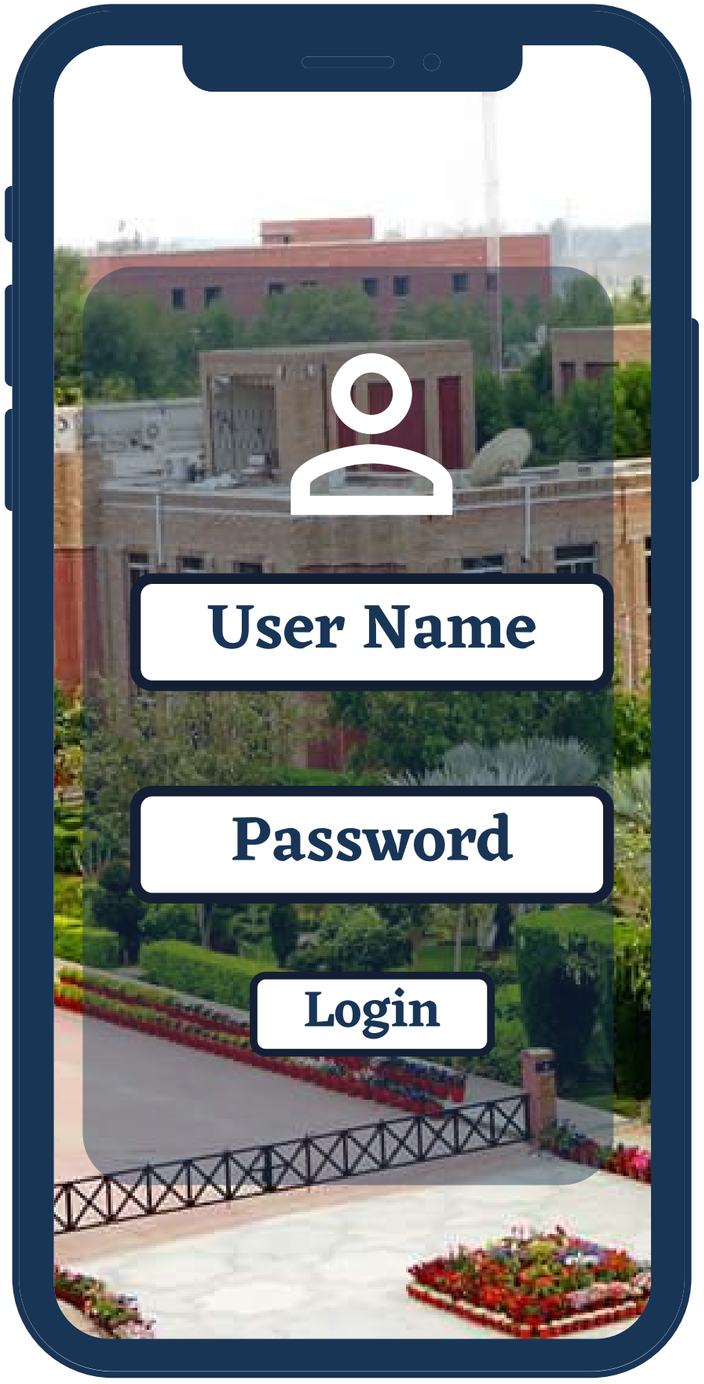
Provost Module of The Project

Provost Level Services Managed (MONITOR)

Student Module of The Project

Student Can Only View Their Details

Students Module will have to login first and the he/she has to view the certain details,



Student Module of The Project

Students can view the certain details,

Technologies For The Project

1. Java (Programming Language)
2. Android Studio (IDE)
3. Database (MySQL)
